COREPLUS WHITEPAPER

Introduction

CorePlus(CORE+) is the first official meme token on the core blockchain.
PLUS is a Web 3.0 Decentralized Social Media Platform That is being built for the core blockchain network audience and Satoshi app miners.
 The token's logo is inspired by the coreDAO logo.
The **+** sign on the logo is symbolizes the idea of an upward movement of the market.
Its value is tied to the overall performance of the crypto market, and token holders can expect to see gains when the market is bullish.
This Token Implements NFT and its agenda is to launch an NFT marketplace where users can trade and Mint NFTs on Core blockchain.

Tokenomics

We created a unique token after many tests to get the best contract for our community, and we succeeded. We have written more than 1500 lines of code that make us unique!

Utility

CORE+ was created as a meme and it's exactly so in the realest sense. All you have to do is be positive and imagine that you are on a rocket and speeding towards the moon. we are going to the moon sooner than you think.

But while we make money for the fun of education and culture, we have developed a very interesting tool to make more money for you as a CORE+ owner and believer. CORE+ plans to majorly adopt NFT implementation by building an NFT marketplace where users can purchase NFTS, mint NFTS and stake NFTS for rewards on the core blockchain.

Roadmap

Although we are a meme token, we've got a seriously planned out gradual progress structure to ensure we take you to the moon and nothing but that.
